EXAMINER'S COMMENT

The Applicant's amended figures 8 and 9 have been considered but have not been approved because in the process of labeling the block diagrams thereof, the Applicant has removed the corresponding element numbering. The elimination of the element numbering from figures 8 and 9 sets forth element numbering which is used in the specification but not in the drawings. In other words, element numbers 50-64 would appear in the specification but not in drawings which would fail to comply with 37 CFR 1.84(p)(5). The Applicant is asked to amend figures 8 and 9 by labeling each block while maintaining the corresponding element numbering to correspond to the written description.

Any inquiry concerning this communication should be directed to Eric S. McCall at telephone number (571) 272-2183.
